Introduction

Knowledge is cumulative: what we know builds over time upon what we learn day after day. Our knowing from yesterday combines with our learning today to create our foundation for tomorrow. Building on this foundation, we find we can learn today what we could not learn yesterday.

Though it seems like a contradiction, this explains why the Akashic Records can be both ancient and new. We are re-visiting ideas that we have known for a very long time and viewing these ancient ideas in new ways. This is why we can say:

**The Akashic Records are a newly interpreted
ancient spiritual practice.**

Why this New-Ancient Description Makes Sense:

First, we are bringing a new focus to an ancient set of ideas.

Second, we are also taking the opportunity to learn new ideas through this newly interpreted focus. When we remember that our learning today is based on a progression of ideas, we can see how it is possible to look at old perceptions and form new ideas and new understanding.

Third, we have set this focus on spiritual practice and particularly as a new focus on an ancient practice. Therefore, we are not talking about any one particular religious faith nor are we talking about the latest self-help fad.

Instead, we are attempting to look with new eyes and find a new perspective on ancient spiritual ideas.

This new interpretation helps us cross over to a new vista where we can also learn to see in new ways about the Akashic Records.

**The New Akashic Records are a bridge to
Your soul's journey as the amazing human being you are.**

**The New Akashic Records are also a bridge to
Infinite Knowing,
Healing Balance and
A Spiritual Practice open to all.**

However, to fully understand why and how the *Akashic Records* function, we need to explore three areas:

One: The ancient ideas which inform our new understanding of the *Akashic Records*

Two: The shift in these ideas, particularly in the late 1800s and early 1900s

Three: The new interpretation of the *Akashic Records* based on the spiritual understanding of energy

Part I

The Ancient Ideas of the Akashic Records

Where the Ancient Ideas Come From

The use of the phrase **Akashic Records** started sometime in the mid to late 1800s in the United States and Europe.

The beliefs of the 1800s associated the Akashic Records with an ancient idea which originally emerged from the earliest periods of Mesopotamia and their Tablets of Destiny.

The Mesopotamians believed that at the beginning of each year, the gods gathered and determined the destiny of all creation for the coming year, recording their decisions on the Tablets of Destiny.

Over the course of history, the concept of the Tablets of Destiny has been included in the:

- ‏ Jewish Torah,
- ‏ Christian Bible, and
- ‏ Islamic Quran.

In each of these sacred manuscripts the

Tablet of Destiny is called the Book of Life.

Additionally, the idea that the divine remembers us and records the actions of our lives is held within the religions of most countries around the world.

What are these Ancient Ideas?

Our earliest understandings about the Akashic Records emerge from the following ancient ideas held since before the beginning of recorded history:

1. God knows and remembers us.
2. God has a plan for each of us.
3. God values our lives.
4. Evidence of God's remembrance and of God's plan for you is found in your Book of Life.
5. Your deeds in this life are recorded in your Book of Life.
6. Your Book of Life is used on Judgment Day when you die to determine the value of your life and your destination in the afterlife: heaven or hell.
7. Your Book of Life is stored in a heavenly library.
8. The recording in your Book of Life is written by God or by a designated recorder.
9. The Book of Life is also known as the Akashic Records.

Part II

The Shift in the Original Ideas of the Akashic Records

Why the Shift?

During the 1800s and 1900s, the formational ideas of the Book of Life and the Akashic Records shifted in large part for two reasons.

First: the introduction of Asian philosophy and religion to Europe and the US. For the first time, large numbers of people began to learn about Hindusim and Buddhism due in large part to the transmission of ideas that began with the British colonization of India in the late 1700s and early 1800s.

Second: a growing interest in spiritual matters outside the direct influence of Christianity. Wide in scope, these interests included many areas such as paranormal activities and abilities, western magic, Eastern religions, alchemy and Kaballah, just to name a few.

How did the original ideas shift?

Shift #1: The Book of Life takes on a new name, the Akashic Records

In the mid-1850s, along with the newly introduced ideas of Hinduism and Buddhism from India and other parts of Asia, a new word moved into the English language:

Akasha. From the Sanskrit, an ancient language used in both Hinduism and Buddhism, the word *Akasha* means to shine or radiate like the sun or stars of the sky.

Used in different ways within Hinduism, Buddhism and Tibetan Bön (the native religion of Tibet), *Akasha* is generally defined to be the source of all spiritual and physical form.

In translation, the *Akasha* was associated with the Western idea of the Ether, a very popular topic of conversation at the time. The Ether was seen to be both the scientific and spiritual explanation for all physical movement, including electricity. The Ether was also believed to be the container of all physical and spiritual form.

Viewed as similar in capacity and contents in the West, all the characteristics of the Ether were attributed to the Akasha.

Thus the Ether as the container for the Book of Life made way for the Akasha to become the location of the Akashic Records.

Shift #2: the Akashic Records are accessible, though limited.

In the original ideas of the Tablet of Destiny and the Book of Life, the gods (or God) create these documents for their own use.

In contrast, ideas about who might have access to the Akashic Records shifts particularly through the work of Helena Blavatsky, founder of the Theosophical Society, in the late 1800s as well as with the work of Edgar Cayce in the early 1900s. No longer limited exclusively to the divine, the Akashic Records can be opened by a limited few with highly gifted spiritual understanding and ability.

This shift comes about in large part because of the growing awareness of the gurus of Eastern religions, trained individuals, and normal, everyday people all possessing extraordinary abilities beyond scientific explanation.

Shift #3: The Akashic Records only contain past life information.

As experience in accessing the Akashic Records increased, many came to believe that the only information available was about past lives or that we only have the ability to access past life information. Either way, the Akashic Records, though associated initially with the Book of Life, are believed to provide a look back rather than a plan forward.

Shift #4: The Book of Life origins fade and the Akashic Records become a heavenly library containing a book about each individual.

With no enduring source of clear information, definitions of the Akashic Records maintain they are eastern in origin most likely because of the word Akasha even though the link in the East is actually through a shared history with the Book of Life.

As the idea of the Akashic Records moved through the Twentieth Century, without clear information and support, the understanding of the Akashic Records has shrunk into several erroneous **myths**:

Old Akashic Records

- ⌘ Accessible in only very limited ways.
- ⌘ Only past life information is available.
- ⌘ Of eastern origin.
- ⌘ A library in heaven containing a book for each individual.

New Akashic Records

- ⌘ As Spiritual Practice, open to all.
- ⌘ Not only past, present, and future information but also divine soul knowing.
- ⌘ Related to most religions as divine knowing.
- ⌘ Exist and move within universal energy.

The good news is that with a new perspective on energy, we can rethink these myths and expand into a wonderful new and empowering understanding of the possibilities of the Akashic Records in each of our lives.

Part III

**The New Interpretation
of the Akashic Records:**
From the perspective of
Spiritual Energy Dynamics

The Basic Principles of Spiritual Energy Dynamics:

With new perspective in the fields of both spirituality and physics, our minds are developing the awareness to understand how a Book of Life might be possible and why the Akashic Records behaves as a bridge. This new interpretation is based on straightforward ideas of how energy moves from the spiritual to the physical. I call this **Spiritual Energy Dynamics**.

1. Everything is Energy.

All we are, feel and know is composed of energy.

This includes your body, your house, your world, and your soul.

2. All energy moves on a continuum between potential and form.

Energy is always in motion. Energy is always moving from potential to form or form to potential. Energy is always somewhere on this infinite and eternal continuum which spans what we know with what we can never know.

Energy moves as potential with intention to participate in All That Is.

Form is the claiming of potential, like the rosebud becoming the rose.

3. Energy exists as either Wave or Particle.

As potential, energy behaves like a wave in the ocean of All That Is.

As form, energy becomes focused like the grain of sand upon the beach.

4. The continuum of energy exists within All That Is.

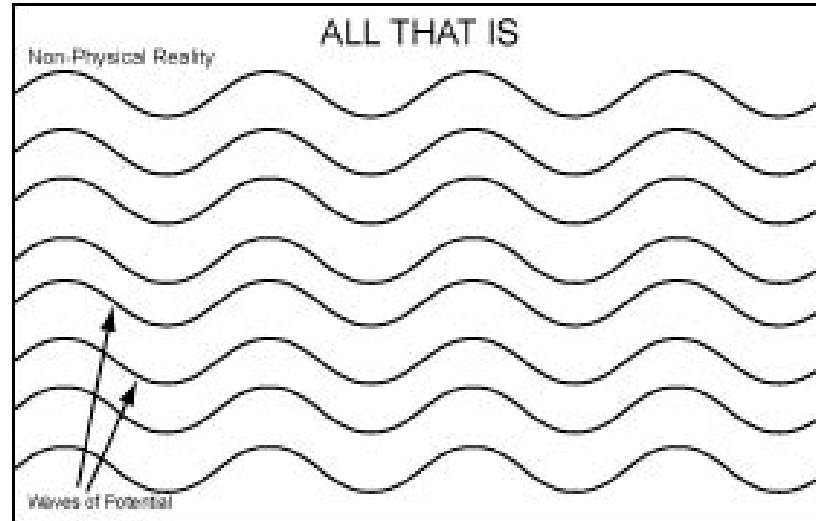

All That Is is simply the name we give to everything spiritual and physical, to everything we know and sense, and to everything beyond what we can never know.

We draw All That Is as box, not because it is one, but as a metaphor to enable our understanding.

5. Within All That Is, Non-Physical Reality.

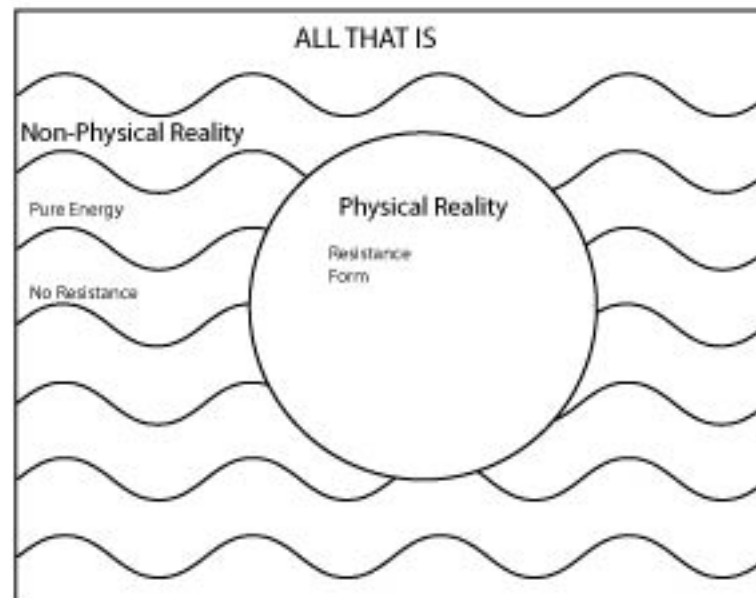

As we begin to focus on All That Is, we can see that energy as potential resides within its own dimension we call Non-Physical Reality. Non-Physical Reality is of pure potential but lacks Resistance, the universal force which moves potential to form.

6. In Physical Reality, there is Resistance and Form.

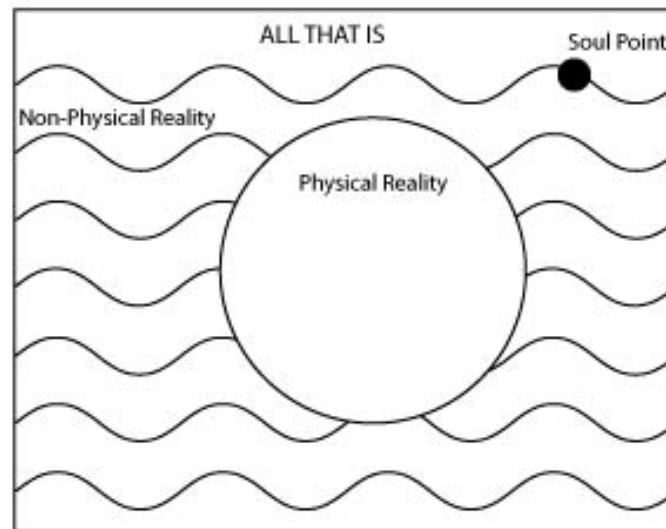

Physical Reality is that part of All That Is which holds Resistance.

In Physical Reality, potential may move toward its desired form.

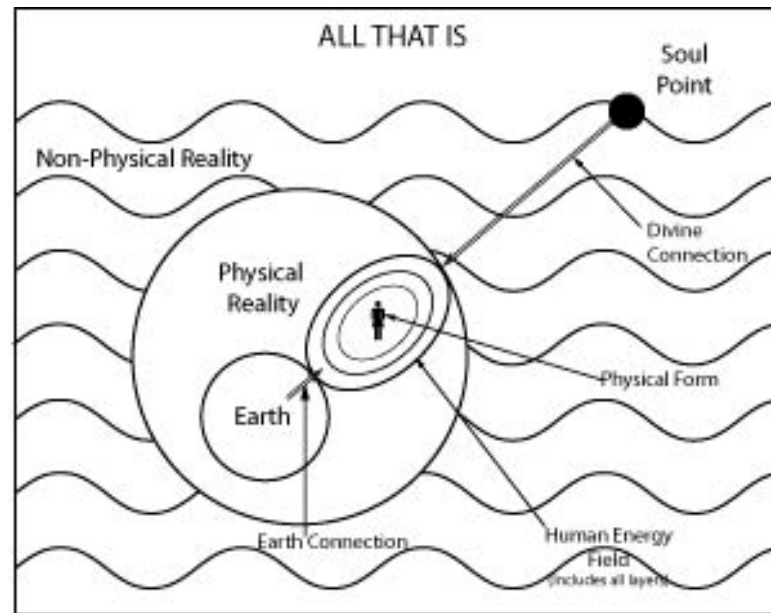

7. **The Soul Point is the wave become Particle.**

In Non-Physical Reality, the waves of potential begin motion toward form. Like a wave within an ocean, a single wave will have a moment of realizing that a wave is both part of and yet also separate from the ocean. In this moment of acknowledging **I AM**, the wave becomes a focused particle called the Soul Point. From the Soul Point, the individual is aware of All That Is though not capable of discerning all the individual parts of All That Is.

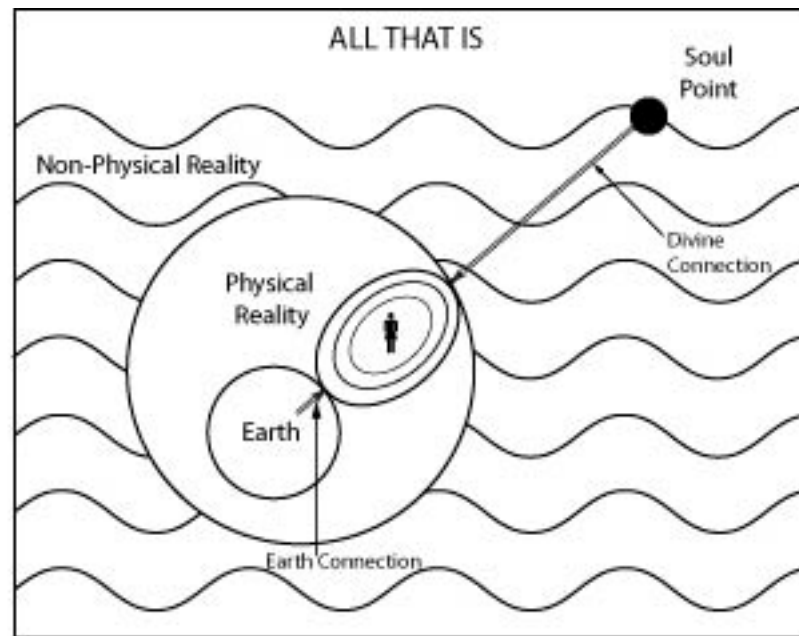

8. All That Is, the Earth, and the spark ignited by our soul create the Human Energy Field, a field to nurture and grow our human form.

The Soul wants to participate in All That Is by transforming soul potential into form. To do this, the soul follows inner intention from the Soul Point into Physical Reality. To help the soul take form on the Earth, Earth sends out her intention towards the soul's flow of intention. When soul intention meets the intention of Earth, the Human Energy Field takes form, providing the perfect environment for the soul's potential to become physical form. This connection of intention between physical being and soul exists through the entirety of human life.

9. **Your Akashic Record is accessed at Your Soul Point.**

By following the connection between your physical being and your Soul Point, you may enter into the energy of your Akashic Records with your conscious awareness. Access is watched over by agreements you make which guide you into the energy of the Akashic Records.

10. All energy has an Akashic Record.

Because Everything is Energy, all the forms which energy becomes has an Akashic Record.

11. Your Akashic Record contains information and knowing for you.

An Akashic Record Reading is an opening and a receiving of the divine knowing available through your soul point. Energy, at the Soul Point, is essentially knowing. There is much to know within the Akashic Records about the past, present, and future. However, the important idea to grasp is that the Akashic Records are not facts nor objects but, instead, are a flow of energy we access as a process of coming to the truth of who we are both spiritually and physically. The Akashic Records create a bridge for understanding the soul's journey from potential to form, from the spiritual to the physical.

12. Your own Akashic Record may be accessed either by someone who knows how or you may learn to open your own.

The process of working within the Akashic Records is open to all. The only requirement is that you believe that you have the capacity to try.

13. No one may gain access to your Akashic Record without your conscious permission.

Your intention is required to receive from your Akashic Record. Without your conscious permission, your intention cannot be expressed and your Akashic Record cannot be accessed.

14. The Akashic Records provides Healing and Balance.

The process of opening and working in the Akashic Records brings you in contact with the pure potential of All That Is. This contact raises your inner levels in such a way that many experience a healing shift towards greater balance within the circumstances of life. In the Akashic Records, healing is understood as a balance of the spiritual and physical with All That Is.

15. As Spiritual Practice, the Akashic Records connect to your soul's truth.

Never intended as a simple parlor game, the Akashic Records require not only a seriousness of purpose, but also integrity and the openness of the beginner. The ability to witness the energetic flow of the Akashic Records instills a perspective which encompasses the entirety of who you are, always supporting your experience of daily life.

Conclusion

**The Akashic Records are a bridge
to your soul's eternal and infinite being and becoming.**

Moving beyond the myths of yesterday, the Akashic Records stand ready to support your eternal and infinite dance of potential and form within the energy of All That Is.

Within the perspective of Spiritual Energy Dynamics, the Akashic Records are not written for you. Instead they are ready for you to create and write for yourself.

As a newly interpreted spiritual practice, the Akashic Records are a bridge between here and now and the eternal moment of the soul's origin. Not as pre-determined fate, but as guide towards understanding the deepest truth of who you are and can become.

The choice and the opportunity are yours!

Is now the time to understand your soul's journey?

What path do you choose?

What is your truth today?
